Projects

OtakuStream

(React Native, Tailwind CSS, Redux, Jikan Api, Expo)

OtakuStream is a mobile app built for anime fans to stream their favorite shows anywhere, anytime. Packed with features like search, genre exploration, filters, and recommendations, it allows you to discover new hidden gems or revisit classics. Powered by Jikan API, Expo CLI, React Native, and Tailwind CSS, OtakuStream delivers a smooth and enjoyable experience with a vast anime library and a modern, user-friendly interface.

SkillSync

(Next.js, Tailwind CSS, Shadcn-UI, Supabase, Prisma, Zustand)

SkillSync is an innovative platform that streamlines online education. Built with Next.js, Shadcn-UI, and Tailwind CSS, it provides a seamless interface for navigation. The platform integrates Supabase and Prisma for structured course management and secure authentication. It also supports payment integration via Stripe, immersive video learning, and personalized course completion certificates.

Shop-Cart

(React.js, Node.js, Express.js, MongoDB, Redux)

Shop-Cart is a full-stack e-commerce web application designed for seamless online shopping. Built using the MERN stack, it features user authentication, product search, cart management, order history tracking, and secure payment processing. The platform consists of two interfaces: one for customers to browse and purchase products and another for admins to manage users, create new admins, add products, and oversee order processing.
